General Information

Description

Developer of an electrolyzer technology designed to produce low-cost onsite industrial green hydrogen. The company's technology can be used for ammonia and fertilizer production, hydrogenation, metal fabrication, glass, methanol, synthetic fuels, chemicals, and power plants, enabling industries to eliminate carbon dioxide emissions from hydrogen production.

Most Recent Financing Status (as of 08-Jan-2025)

The company raised $16.72 million of Series A venture funding in a deal led by bp Ventures on November 12, 2024, putting the company's pre-money valuation at $42.28 million. Mitsubishi Heavy Industries and 6 other investors also participated in the

VC Exit Predictor

Leverage PitchBook's algorithmic insights to compare investment opportunities and forecast the exit trajectories of venture-backed companies.

Opportunity Score

Percentile comparison of the expected return on investment for Advanced Ionics compared to other venture-backed companies. Calculated using Exit Type probabilities, the company's stage, and PitchBook's historical returns data.

85 / 100

Out of 65,638 companies with Opportunity Score

Exit Type

Evaluates VC-backed companies' likelihood of a successful exit for investors, and the most likely exit type. Generated by a machine learning algorithm, leveraging Market Positioning, Company Performance Indicators, Active Investors, and Deal Activity. The algorithm does not consider additional factors that may be relevant to a company's exit chances and should not be used as a replacement for investment due diligence.
