OKC & Tulsa Metro Area

INTRODUCTION

Hydrogen plays a vital, albeit often unseen, role in a diverse array of industries and research activities across Oklahoma's major metropolitan areas. Companies in manufacturing, energy, and technology, alongside prominent research institutions, hospitals, and universities in the Oklahoma City and Tulsa regions, routinely purchase hydrogen from industrial gas suppliers. This document provides an overview of these entities, detailing their sectors, contact information, and specific ways in which hydrogen is integrated into their daily operational workflows.

OKLAHOMA CITY AREA

Bodycote Thermal Processing

- **Industry**: Manufacturing (Metal Heat Treatment)
- **Contact**: 6924 S Eastern Ave, Oklahoma City, OK 73149; Phone: (405) 670-5710; Email: customer.response@bodycote.com; Website: bodycote.com
- **Hydrogen Use**: Bodycote utilizes hydrogen gas in high-temperature furnaces as a protective atmosphere for specialized hydrogen brazing services. This controlled hydrogen environment prevents oxidation during the joining of metal parts, a critical process for aerospace and industrial components. (Source: bodycote.com)

Baker Hughes Energy Innovation Center

- **Industry**: Energy Technology (Oil & Gas Equipment R&D)
- **Contact**: 300 NE 9th St, Oklahoma City, OK 73104; Phone: (405) 896-4593; Website: bakerhughes.com
- **Hydrogen Use**: The Baker Hughes Energy Innovation Center in Oklahoma City is involved in research and development of hydrogen-based power systems, including testing hydrogen-blended turbine systems designed to convert fuel waste into cleaner energy. Lab-scale turbines and test rigs are operated using hydrogen-natural gas mixtures to validate technology for hydrogen-fueled electricity generation. (Source: oklahomaenergytoday.com on Baker Hughes' OKC hydrogen initiatives)

Oklahoma Gas & Electric (OG&E)

- **Industry**: Energy (Electric Utility)

- **Contact**: 321 N Harvey Ave, Oklahoma City, OK 73102; Phone: (405) 272-9741; Website: oge.com
- **Hydrogen Use**: OG&E's power plants utilize high-purity hydrogen gas for cooling large electric generators, a standard industry practice. Hydrogen's superior thermal conductivity and low density effectively dissipate heat in generator cooling systems, particularly in steam-turbine power stations, enhancing operational efficiency. (Source: Wikipedia - Hydrogen-cooled turbo generator)

Oklahoma Medical Research Foundation (OMRF)

- **Type**: Research Lab

© 2026 TOBE ENERGY INC.

- **Contact**: 825 NE 13th St, Oklahoma City, OK 73104; Phone: (405) 271-6673; Email: Contact@omrf.org; Website: omrf.org
- **Hydrogen Use**: OMRF's biomedical research laboratories purchase compressed hydrogen gas for daily operations, including its use as a carrier and fuel gas in analytical instruments like gas chromatographs and mass spectrometers for analyzing biological samples. Hydrogen is also employed to create controlled reducing environments for specific biochemical reactions. (Source: Peak Scientific on H_2 in GC)

University of Oklahoma - Norman Campus (OU)

- **Type**: University
- **Contact**: 660 Parrington Oval, Norman, OK 73019; Phone: (405) 325-0311; Website: ou.edu
- **Hydrogen Use**: OU's scientific research labs in chemistry, engineering, and related fields procure hydrogen gas cylinders. Hydrogen is used daily as a reagent for hydrogenation reactions in chemistry experiments and as a carrier gas in analytical instruments. OU researchers are also actively involved in hydrogen fuel and energy projects, with engineering labs specializing in hydrogen production and fuel cell technology. (Source: OU Gallogly College of Engineering - Hydrogen Research)

University of Oklahoma Health Sciences Center (OUHSC)

- **Type**: Academic Medical Center
- **Contact**: 1100 N. Lindsay Ave, Oklahoma City, OK 73104; Phone: (405) 271-4000; Website: ouhsc.edu
- **Hydrogen Use**: OUHSC laboratories and core facilities purchase high-purity hydrogen for scientific and medical research applications. Biomedical research labs utilize hydrogen gas daily for analytical assays, such as fuel for flame ionization detectors in gas chromatography for pharmacology and toxicology research.

OU Health - University of Oklahoma Medical Center

- **Type**: Hospital (Academic)
- **Contact**: 700 NE 13th Street, Oklahoma City, OK 73104; Phone: (405) 271-4700; Website: ouhealth.com (General Info: ahd.com)

- **Hydrogen Use**: The hospital's pathology and diagnostic labs purchase hydrogen for analytical instruments. Toxicology labs may employ gas chromatography-mass spectrometry (GC-MS) using hydrogen as a carrier gas or flame fuel for sensitive detection of compounds in patient samples. (Source: PMC NCBI on GC-MS in clinical tox)

Integris Baptist Medical Center

- **Type**: Hospital
- **Contact**: 3300 Northwest Expressway, Oklahoma City, OK 73112; Phone: (405) 949-3011; Website: integrishealth.org
- **Hydrogen Use**: Clinical laboratories at Integris Baptist utilize hydrogen gas for routine operations, particularly in toxicology and research. Instruments like gas chromatographs use hydrogen for flame ionization detectors or as a carrier gas, aiding in drug screenings and metabolic tests.

Mercy Hospital Oklahoma City

- **Type**: Hospital
- **Contact**: 4300 W. Memorial Road, Oklahoma City, OK 73120; Phone: (405) 755-1515; Website: mercy.net
- **Hydrogen Use**: Mercy Hospital's clinical laboratories use hydrogen for analytical and diagnostic devices. This includes use in gas analyzers calibrated with hydrogen-containing mixtures for tests like hydrogen breath tests, or as a carrier gas in gas chromatography for toxicology. (Source: Labmate Online on H_2 in GC)

Oklahoma City VA Medical Center

- **Type**: Hospital
- **Contact**: 921 NE 13th Street, Oklahoma City, OK 73104; Phone: (405) 456-1000; Website: va.gov/oklahoma-city-health-care/
- **Hydrogen Use**: The VA Medical Center purchases hydrogen for laboratory analyzers and research protocols. Clinical chemistry and research labs use hydrogen in instruments like gas chromatographs and certain mass spectrometers for drug screening or research. (Source: SWOSU Digital Commons example of GC-MS use in research)

Norman Regional Hospital

- **Type**: Hospital
- **Contact**: 901 N. Porter Ave., Norman, OK 73071 (Main Campus) / HealthPlex: 3300 HealthPlex Parkway, Norman, OK 73072; Phone: (405) 307-1000; Website: normanregional.com
- **Hydrogen Use**: Norman Regional's laboratories purchase compressed hydrogen for diagnostic testing, such as in gas chromatography where hydrogen provides the flame for detectors or serves as a carrier

gas to separate compounds in patient samples for neonatal screening or toxicology.

University of Central Oklahoma (UCO)

- **Type**: University
- **Contact**: 100 N. University Drive, Edmond, OK 73034; Phone: (405) 974-2000; Website: uco.edu
- **Hydrogen Use**: UCO's science labs in its College of Mathematics and Science use hydrogen for gas chromatographic analyses in chemistry and forensic science coursework, and in undergraduate experiments like organic chemistry hydrogenation reactions or fuel cell demonstrations.

© 2026 TUBE ENERGY INC.

TULSA AREA

Public Service Company of Oklahoma (PSO - AEP)

- **Industry**: Energy (Electric Utility)
- **Contact**: 212 E 6th St, Tulsa, OK 74119; Phone: (888) 216-3523; Website: psoklahoma.com
- **Hydrogen Use**: PSO operates power plants, such as its Northeastern Station, that utilize hydrogen for generator cooling. Permanent hydrogen cylinders are used to control generator heat exchange, with hydrogen gas circulating through turbine generators to remove heat and ensure efficient operation. (Source: DEQ Oklahoma Permit for Northeastern Station - mentions H_2 systems)

John Zink Hamworthy Combustion

- **Industry**: Manufacturing (Industrial Combustion Equipment)
- **Contact**: 11920 E Apache St, Tulsa, OK 74116; Phone: (918) 234-1800; Website: johnzinkhamworthy.com
- **Hydrogen Use**: John Zink's R&D test center in Tulsa uses hydrogen fuel to develop and test burners, flares, and combustion systems. They conduct daily tests with hydrogen to ensure safe and efficient combustion of hydrogen-rich fuels, enabling the design of low-NOx burners and flares for refineries and power plants. (Source: John Zink - Hydrogen Firing)

Zeeco, Inc.

- **Industry**: Manufacturing (Combustion and Environmental Systems)
- **Contact**: 22151 E 91st St S, Broken Arrow, OK 74014; Phone: (918) 258-8551; Email: sales@zeeco.com; Website: zeeco.com
- **Hydrogen Use**: Zeeco operates a large combustion research and test facility where it fires burners on various fuel mixtures, including hydrogen blended with natural gas, to simulate high-hydrogen fuels for client applications. Their on-site fuel storage and blending systems facilitate this daily testing. (Source: Zeeco Test Facility Brochure via HubSpot)

Linde Engineering - Hydrogen Solutions

- **Industry**: Engineering & Manufacturing (Hydrogen Production & Liquefaction Equipment)
- **Contact**: 6100 S Yale Ave Ste. 1200, Tulsa, OK 74136; Phone: (918) 477-1200; Website: linde-engineering.com
- **Hydrogen Use**: Linde's Hydrogen Solutions division, with operations in the Tulsa area, designs HYDROPRIME® hydrogen generators and fueling solutions. Engineers test and validate hydrogen generation units and cryogenic hydrogen liquefiers, involving the handling of hydrogen gas and liquid hydrogen in their fabrication and R&D facility (which includes a hydrogen lab). (Source: Linde Engineering - HYDROPRIME)

Sagebrush Pipeline Equipment Co.

- **Industry**: Manufacturing (Pipeline Control & Gas Blending Systems)
- **Contact**: 8101 W Hwy 66, Tulsa, OK 74131; Phone: (918) 551-5626; Website: sagebrushpl.com
- **Hydrogen Use**: Sagebrush fabricates and tests gas measurement and blending skids, including systems for blending hydrogen into natural gas streams. The Tulsa facility handles hydrogen during prototype assembly and testing of these units, sometimes in partnership with institutions like the University of Tulsa for pipeline mixture tests. (Source: EnergyNews.pro on Sagebrush H_2 blending)

Luxfer-GTM Technologies

- **Industry**: Manufacturing (Hydrogen Fuel Cell Generators & Gas Transport Modules)
- **Contact**: 5785 Bird Creek Ave, Catoosa, OK 74015; Phone: (918) 439-4248; Website: luxfergtm.com (Note: GTM Technologies was acquired by Luxfer)
- **Hydrogen Use**: Luxfer-GTM manufactures zero-emission hydrogen generators (like the "Zero-Set" portable units) and high-pressure storage trailers. The Catoosa plant conducts assembly and on-site testing of hydrogen fuel cell generators, requiring hydrogen filling and load testing. (Source: NewsOn6 on Zero-Set generator, TransportProject.org on Luxfer H_2 systems)

University of Tulsa (TU)

- **Type**: University
- **Contact**: 800 S. Tucker Drive, Tulsa, OK 74104; Phone: (918) 631-2000; Website: utulsa.edu
- **Hydrogen Use**: TU's laboratories in engineering, natural sciences, and petroleum research purchase hydrogen for teaching and advanced research. Hydrogen is used in chemistry labs (e.g., as a reducing gas) and in analytical instrumentation like gas chromatographs. TU's research into alternative energy and fuel cells also involves using hydrogen to test fuel cell performance.

OU-Tulsa Schusterman Center

- **Type**: University (Health Sciences Campus)
- **Contact**: 4502 E. 41st Street, Tulsa, OK 74135; Phone: (918) 660-3000; Website: ou.edu/tulsa
- **Hydrogen Use**: OU-Tulsa labs use hydrogen for routine work, such as calibrating medical devices or in research instruments. Clinical research facilities might use hydrogen in gas analyzers for respiratory research or in lab tests related to metabolism, supporting projects within OU's School of Community Medicine.

© 2026 TOBE ENERGY INC.

Oklahoma State University Center for Health Sciences (OSU-CHS)

- **Type**: University (Medical School & Research Center)
- **Contact**: 1111 W. 17th Street, Tulsa, OK 74107; Phone: (918) 582-1972; Email: chs.externalaffairs@okstate.edu; Website: health.okstate.edu
- **Hydrogen Use**: OSU-CHS research and teaching facilities purchase hydrogen for daily scientific operations. Pharmacology and forensic labs use hydrogen in analytical equipment like GC-MS for drug analysis and forensic investigations. Hydrogen is also employed in biomedical experiments requiring controlled atmospheres.

Oklahoma State University Medical Center (OSU Medical Center)

- **Type**: Hospital
- **Contact**: 744 W. 9th Street, Tulsa, OK 74127; Phone: (918) 599-1000; Website: osumc.com (General Info: ahd.com)
- **Hydrogen Use**: OSU Medical Center's clinical laboratories use hydrogen for lab analyses, such as forensic toxicology tests or therapeutic drug monitoring using GC-MS, which requires high-purity hydrogen for detector flames and carrier flow.

Saint Francis Hospital

- **Type**: Hospital
- **Contact**: 6161 S. Yale Avenue, Tulsa, OK 74136; Phone: (918) 494-2200; Website: saintfrancis.com
- **Hydrogen Use**: Saint Francis Hospital's clinical laboratory and research departments use hydrogen in gas chromatography for toxicological screenings and in certain blood analyzers. Hydrogen-fed flame detectors are used to analyze organic compounds in various tests.

Ascension St. John Medical Center

- **Type**: Hospital
- **Contact**: 1923 S. Utica Avenue, Tulsa, OK 74104; Phone: (918) 744-3131; Website: healthcare.ascension.org (General Info: ahd.com)

- **Hydrogen Use**: The hospital's pathology and clinical chemistry labs use hydrogen for operating instruments like flame ionization detectors in GC analyses of patient samples for toxicology or medication confirmation. Respiratory therapy might use hydrogen in calibration gases.

Hillcrest Medical Center

- **Type**: Hospital
- **Contact**: 1120 S. Utica Avenue, Tulsa, OK 74104; Phone: (918) 579-1000; Website: hillcrestmedicalcenter.com (General Info: ahd.com)

© 2026 TOBE ENERGY INC.

- **Hydrogen Use**: Hillcrest's medical laboratories use hydrogen for analyzers in metabolic testing or in GC-MS systems for clinical sample analysis. Pharmacy or research units might use hydrogen as a reagent or carrier gas.

OTHER NOTABLE INSTITUTIONS IN OKLAHOMA

Oklahoma State University - Stillwater (OSU Main Campus)

- **Type**: University
- **Contact**: 219 Student Union, Stillwater, OK 74078; Phone: (405) 744-5000; Website: okstate.edu
- **Hydrogen Use**: OSU's Stillwater campus research labs in chemistry, biochemistry, veterinary medicine, and engineering purchase hydrogen. It's used in flame ionization detectors, as a carrier gas in chromatographic systems, and in engineering projects developing hydrogen fuel cells and materials science experiments.

Oklahoma State Public Health Laboratory (OSDH PHL)

- **Type**: Public Health Research Lab
- **Contact**: 4615 W. Lakeview Rd, Stillwater, OK 74075; Phone: (405) 564-7750; Email: PublicHealthLab@health.ok.gov; Website: oklahoma.gov/health/services/laboratory-services/public-health-laboratory.html
- **Hydrogen Use**: The State PHL uses hydrogen in analytical instruments for newborn screening, environmental toxin identification (often using GC-MS with hydrogen as a carrier gas), flame photometric detectors, and in microbiology incubators requiring specific atmospheric conditions.

Phillips 66 Research Center

- **Type**: Corporate Research Lab
- **Contact**: US-60 & State Hwy 123, Bartlesville, OK 74004; Phone: (918) 661-3317; Website: phillips66.com/research-center/

- **Hydrogen Use**: This large energy research center uses significant volumes of hydrogen gas daily for catalyst testing, petroleum refining simulations (feeding hydrogen into reactors), analytical labs (GC analysis of petroleum products using hydrogen flames in detectors), and R&D into renewable hydrogen fuel technologies, including prototype fuel cell and electrolyzer testing. (Source: Phillips 66 Sustainability Report on hydrogen initiatives)

CONCLUSION

© 2026 TOBE ENERGY INC.

The diverse applications detailed above illustrate the consistent demand for hydrogen across key sectors in Oklahoma City, Tulsa, and surrounding areas. From specialized manufacturing processes and utility operations to advanced energy research, medical diagnostics, and academic studies, externally supplied hydrogen is an essential commodity supporting daily innovation and operational needs within these Oklahoma communities.
