1. INTRODUCTION

This document outlines a proposed organizational structure and leadership framework for Tobe Energy, reflecting our vision for the coming years as we continue to secure funding, gain market traction, and scale our operations. It represents an aspirational blueprint rather than an immediate snapshot, assuming we achieve the necessary level of growth, capital, and customer demand to justify each role and team.

While we are committed to building toward this comprehensive structure as soon as reasonably possible, it is not expected that all the positions, departments, and specialized teams will be fully staffed within 2025. Instead, this serves as a roadmap, guiding our hiring priorities, talent development, and internal processes as our production volumes increase, our product lines expand, and our customer base broadens.

As we advance from pilot-scale units to industrial-scale hydrogen production and integrated solutions, we will strategically add key roles and scale teams proportionally to our progress. The ultimate goal is to ensure that Tobe Energy's organizational design supports efficient decision-making, fosters innovation, meets regulatory standards, and delivers exceptional value to our customers.

2. ORGANIZATIONAL CHART OVERVIEW

CEO (Chief Executive Officer) | ├── CTO (Chief Technology Officer) | └── Oversees R&D, product innovation, and technical strategy for electrolysis systems. | • Leads teams responsible for core electrolysis technology, power electronics, materials, and continuous efficiency improvements. | ├── COO (Chief Operating Officer) | └── Responsible for manufacturing, supply chain, quality assurance, and field installations. | • Ensures equipment is produced at scale, delivered on time, and maintained efficiently. | ├── CFO (Chief Financial Officer) | └── Manages financial strategy, investor relations, budgeting, and capital allocation. | • Works closely with CEO and COO to ensure cost competitiveness and financial health. | ├── VP of Product & Engineering | └── Translates the CTO's technical vision into tangible products, features, and product roadmaps. | • Oversees hardware, software integration, and product testing teams to ensure performance targets and deadlines are met. | ├── VP of Sales & Partnerships | └── Develops go-to-market strategies, secures customer contracts, and forms strategic industry partnerships. | • Works with operations to ensure supply meets demand and maintains strong customer relationships. | └── VP of Regulatory & Compliance └── Guides the company through certification processes (UL, CE, ISO), and ensures adherence to safety and environmental standards. • Monitors evolving regulatory landscapes and positions the company for favorable market entry.

3. DETAILED REPORTING STRUCTURE

CEO

Provides overarching guidance, long-term vision, and makes final strategic decisions. Balances input from CTO (technology roadmap), COO (operational feasibility), CFO (financial viability), and commercial leaders.

CTO → Technical Teams

- **R&D Team Leads (Electrochemical, Electrical, Mechanical, Materials Scientists):** Develop and refine core electrolysis stacks, LLC resonant power systems, and improve energy efficiency.
- **Testing & Validation Engineers:** Conduct performance, reliability, and stress tests, providing data for continuous improvement.

COO → Operations & Field Teams

- **Manufacturing Manager:** Oversees in-house transformer winding, injection molding, PCB production, and assembly lines.
- **Supply Chain & Logistics Lead:** Manages component sourcing, inventory control, and delivery schedules.
- **Field Installation & Maintenance Teams:** Deploy systems at customer sites, perform routine maintenance, and ensure uptime.

CFO → Finance & Administrative Teams

- **Finance Managers & Analysts:** Budgeting, forecasting, and financial reporting.
- **Investor Relations & Capital Markets Specialist:** Communicates with investors, secures funding, and manages stakeholder expectations.
- **HR & Talent Acquisition:** Attracts and retains top engineering and operational talent, shapes company culture.

VP of Product & Engineering → Product Development Teams

- **Product Managers:** Translate technical capabilities into product features aligned with customer requirements.
- **Hardware & Software Integration Engineers:** Ensure seamless integration of electrolysis stacks with power electronics, control systems, and third-party hardware (fuel cells, generators).
- **Quality Assurance Team:** Establishes standards for product performance, lifecycle testing, and compliance with ISO/CE/UL certifications.

VP of Sales & Partnerships → Commercial & Customer Teams

- **Business Development Managers:** Identify growth markets (combustion, fertilizer, steel), secure pilot projects, and negotiate contracts.
- **Account Managers & Customer Success Representatives:** Maintain relationships with early adopters, ensuring customer satisfaction and expanding offtake agreements.
- **Marketing & Communications:** Industry event presence, technical white papers, brand messaging, and lead generation.

© 2026 TOBE ENERGY INC.

VP of Regulatory & Compliance → Certification & Safety Teams

- **Regulatory Affairs Specialists:** Research applicable UL, CE, and ISO standards, coordinate certification testing.
- **Safety & Compliance Officers:** Maintain rigorous safety protocols, documentation, and ensure adherence to environmental and industry guidelines.

4. KEY MANAGEMENT TEAM BIOS: DESIRED QUALITIES

CEO & Founder

A visionary leader with a deep background in electrochemistry and renewable energy systems. Combines technical expertise with strategic business acumen to guide Tobe Energy's growth.

CTO

An accomplished engineer with decades of experience in advanced power electronics and system design. Passionate about pushing the boundaries of electrolysis efficiency. Previously led R&D teams at top-tier green tech firms, published multiple peer-reviewed papers on resonant circuit designs.

COO

A seasoned operations professional with a track record in scaling manufacturing lines and supply chains for complex industrial equipment. Has spearheaded Lean manufacturing initiatives and previously managed operations at a large-scale energy equipment manufacturer.

CFO

A financial strategist with experience in venture-backed clean energy startups. Specializes in capital structure optimization, investor relations, and financial modeling. Previously supported multiple successful funding rounds and strategic partnerships.

VP of Product & Engineering

An engineering leader who excels at bridging the gap between cutting-edge R&D and market-ready products. Prior leadership roles in product management at leading energy storage firms, ensuring timely product launches that balance innovation with reliability.

VP of Sales & Partnerships

A business development expert with a strong network in hard-to-abate industries (fertilizer, steel, refining). Skilled at translating customer needs into strategic sales pitches and building long-term partnerships that drive market penetration.

© 2026 TOBE ENERGY INC.

VP of Regulatory & Compliance

A compliance specialist with extensive experience navigating complex certification environments. Has successfully led teams through UL, CE, and ISO approvals in multiple energy-related ventures, ensuring all products meet stringent global safety and environmental standards.

5. CULTURAL & LEADERSHIP ALIGNMENT (INSPIRED BY JENSEN HUANG)

- **Bold Vision & Technical Excellence:** The CEO sets a technology-first vision — mirroring Jensen Huang's approach where engineering quality and innovation drive the company's competitive edge.
- **Integrated Decision-Making:** Functional leaders (CTO, COO, CFO, VP of Product & Engineering) meet regularly, aligning technical feasibility, operational efficiency, and financial viability.
- **Customer-Centric Innovation:** Sales & Partnerships and Regulatory teams ensure that what's developed in R&D truly meets market needs and compliance requirements, reflecting a holistic approach.
- **Agile & Responsive Structure:** The organizational chart is designed for quick iteration. Teams can pivot fast as new market intelligence emerges, allowing for rapid product refinement.
- **Continuous Learning & Upgrading Skills:** Cross-functional knowledge sharing, regular training, and industry event participation ensure every leader and team member remains at the cutting edge of their field.
