ELECTROLYZER TECHNOLOGY

# ISOTHERMAL ELECTROLYSIS.

## >92% SYSTEM EFFICIENCY.

Pulsed waveform architecture eliminates waste heat. No platinum. No iridium. No membranes. Industrial-grade hydrogen production at unprecedented efficiency using commodity materials.

## EXECUTIVE SUMMARY

Tobe Energy operates with a lean, founder-led structure optimized for rapid iteration and execution. The current team reports directly to CEO Colby DeWeese, reflecting our stage and focus on product-market fit over organizational complexity.

Our aspirational organizational model draws inspiration from NVIDIA's flat, execution-oriented structure — minimizing layers between technical talent and strategic decision-making while maintaining clear accountability.

**For complete team biographies and detailed backgrounds, see the Team page in the data room.**

## CURRENT STRUCTURE (MARCH 2026)

All team members currently report directly to **Colby DeWeese, CEO**.

This flat structure enables:

- **Rapid decision-making** — No multi-layer approval chains
- **Direct technical feedback loops** — Engineering insights reach leadership immediately
- **Resource efficiency** — Minimal overhead, maximum execution bandwidth
- **Cross-functional collaboration** — Natural information flow across disciplines

### Core Team Roles

**Colby DeWeese** — CEO & Co-Founder Strategic direction, fundraising, product vision, key partnerships

**Dr. Caleb Lareau** — Co-Founder Technical validation, scientific advisory, research collaborations

**Louis Mounsey** — CFO Financial operations, investor relations, compliance, capital allocation

**Engineering Team** Electrochemistry, power electronics, controls, manufacturing, testing

**Operations** Supply chain, assembly, quality assurance, field deployment

*(See data room Team page for full bios and backgrounds)*

## TARGET OPERATING MODEL: NVIDIA-INSPIRED FLAT STRUCTURE

As Tobe scales from seed stage to Series A and beyond, we will maintain **organizational flatness as a core principle**, not a temporary phase.

### Design Philosophy

© 2026 TOBE ENERGY INC.

**Minimize hierarchy. Maximize communication bandwidth.**

NVIDIA's structure (famously flat, with 40+ direct reports to Jensen Huang at peak) optimizes for:

1. **Speed of information flow** — No "telephone game" between engineering and executive decisions
2. **Technical accountability** — Leaders must deeply understand their domains; they can't delegate comprehension
3. **Cross-functional innovation** — Horizontal collaboration trumps vertical reporting chains
4. **Founder-scale leverage** — Leadership bandwidth scales through clarity of vision, not management layers

### How This Translates to Tobe

**Functional leads report directly to the CEO**, not through a layered org chart:

- CTO (when hired): R&D, product innovation, IP strategy
- VP Engineering: Hardware, power systems, manufacturing engineering
- VP Operations: Supply chain, assembly, field installations, quality
- VP Commercial: Sales, partnerships, customer success
- CFO: Finance, legal, compliance, HR

**No "Chief of Staff" or intermediary layers.** Each functional leader owns outcomes and communicates directly.

**Team size targets per function:**

- Early stage (now → Series A): 2–5 people per function
- Growth stage (Series A → B): 5–15 people per function
- Scale stage (Series B+): Functional leads may add *one* layer of management, but default is still flat

### Why This Matters for Investors

Traditional org structures in hardware/energy companies create:

- **Communication latency** — Engineering insights take weeks to reach executive decisions
- **Diffusion of accountability** — Failures get blamed on "cross-functional alignment gaps"
- **Overhead bloat** — Middle management consumes 15–25% of headcount budget

Tobe's flat model ensures:

- **Capital efficiency** — More budget allocated to engineering and production vs. management overhead
- **Faster iteration cycles** — Product decisions made in days, not quarters
- **Retained founder control** — Colby remains deeply embedded in technical execution, not abstracted into "strategic oversight"

---

## — TALENT STRATEGY

**Hire for ownership, not specialization.**

We prioritize:

- **Generalists with deep technical spikes** — Engineers who can own end-to-end systems, not just components
- **Operators with startup experience** — People who've built before, not just managed
- **Cultural fit for flat structures** — Comfortable with ambiguity, direct communication, and high autonomy

**Not hiring for:**

- Traditional "VP of X" roles with large teams and org-building mandates (yet)
- Process-heavy project managers or coordinators
- Specialists who can't context-switch across technical domains

---

## — GOVERNANCE & REPORTING

**Board of Directors** Colby DeWeese provides quarterly board updates covering:

- Product milestones and technical progress
- Financial performance and runway projections
- Fundraising status and capital deployment
- Key hires and organizational changes

**Investor Updates** Monthly email updates to investors with metrics, wins, blockers, and asks.

**Internal Rhythms**

- Weekly all-hands (30 min, tactical updates)
- Bi-weekly functional deep-dives (CTO, Ops, Commercial, Finance rotate)
- Monthly strategic review (OKRs, roadmap, resource allocation)

---

## SCALING PRINCIPLES

© 2026 TOBE ENERGY INC.

As Tobe grows, we commit to:

1. **Preserving flatness until it breaks** — Only add layers when communication bottlenecks become measurable (e.g., >20 direct reports per leader)
2. **Hiring senior ICs over managers** — Individual contributors with deep expertise scale impact better than coordinators
3. **Avoiding premature org complexity** — No "Head of Strategy," "Chief of Staff," or "VP of Innovation" roles until post-Series B
4. **Transparent decision-making** — Major decisions documented in Notion, accessible to entire team

**If we need middle management, it's a sign we hired the wrong leaders.**

---

*For detailed team bios, technical backgrounds, and advisor profiles, refer to the Team page in the Tobe Energy data room.*

*This document reflects Tobe Energy's organizational philosophy as of March 2026. Structure and roles will evolve with company growth, but the principles of flatness, speed, and technical accountability remain core to our operating model.*
